

Week 14 – Extended Multi-Language Testing

Summary:

Week 14 focused on **verifying backend functionality across extended test cases** for all supported languages.

Key Activities:

- Executed **complex programs** in Python, C, C++, and Java.
- Tested programs with **large input datasets**.
- Checked for memory leaks, crashes, or unexpected errors.
- Prepared detailed **bug report and fixes** for identified issues.

Technologies Used: Python, FastAPI, Docker, GCC, g++, JDK, WSL2

Outcome:

Backend is **robust**, capable of handling complex programs across all supported languages.
