

Week 23 – Backend Documentation & Future Planning

Summary:

This week focused on documenting backend functionality and planning future enhancements.

Key Work Performed:

- Documented backend workflow and execution steps.
- Prepared written documentation for supported languages and libraries.
- Outlined proposed frontend integration for future development.
- Reviewed backend readiness for future extensions.

Technologies Used:

Markdown, Python, FastAPI, Docker

Outcome:

Backend documentation was completed and future frontend integration was clearly defined as proposed work.
