

Week 8 – Documentation & Frontend Proposal

Summary:

Week 8 focused on **documentation of backend features** and planning the **future frontend interface**.

Key Activities:

- Created detailed **technical documentation** for FastAPI endpoints, Docker setup, and pre-installed libraries.
- Generated **PDF reports** of backend test results and multi-language executions.
- Proposed a **frontend interface** for future work: web-based code submission, execution, and output visualization.

Technologies Used: Python, FastAPI, Docker, VS Code, Markdown/PDF

Outcome:

Backend is fully functional and **well-documented**. Frontend is **planned for future implementation**, ensuring smooth integration later.
